

LEUVEN STATISTICS RESEARCH CENTRE

February 23, 2023

Quadrivium, Heverlee

#### Introduction

On **February 23**, **2023**, the Leuven Statistics Research Center organizes its yearly Datathon and Job fair event.

The **Datathon** is a datamining competition in which teams of KU Leuven (Bachelor, Master and PhD students) work together to discover and share insights regarding a large and challenging data set. The students are organised in teams and are given a full week to work out a solution, which is pitched to the jury on the final day of the competition. We thank the sponsors Risk Concile, KPMG, KBC, PwC and Deloitte to make this event possible.

The **Job fair** gives students with an interest in Statistics and Data Science the opportunity to meet companies looking for new data driven employees or interns. We are happy to welcome a variety of companies representing a wide range of sectors. In this booklet, you can find information on all companies attending the job fair.

#### The organizing committee of the Datathon & Jobfair

Prof. Jan De Spiegeleer, Prof. An Carbonez, Prof. Ingrid Van Keilegom, Prof. Geert Molenberghs, Prof. Martial Luyts, Ruben Kerkhofs, Eveline Declercq, Febe Brackx, Eva Verschueren and Gregory van Kruijsdijk.

Sciensano	23

# **Arcelor Mittal**

- □ recruitment@arcelormittal.com
- **Q** Gent, Liège, Geel, Genk (Belgium)
- **belgium.arcelormittal.com**

#### **Company information**

Cars, wind turbines, design homes... everywhere you look, you will find our steel. Creating innovative and durable steel products for a wide range of everyday applications is what we stand for. Our strengths are clear: we work with highly skilled professionals, are close to our customers and infrastructure enables collaboration with OUr complementary sectors. In addition, our steel is also seen as the cornerstone of a circular economy and as a basic material for renewable energy. Without ArcelorMittal, one of the world's largest steel and mining companies, your world would look completely different. Steel is everywhere and our steel can be made by you! Join our team and get started with today's most innovative technologies!

#### What do we have to offer?

Working at ArcelorMittal means having opportunities for a great career and the possibility to build an international career. We give talent every opportunity to flourish with a tailor-made training program. You will be part of a team of dynamic people working day in and day out on improvements in all areas and with pioneering technologies.

You can count on an attractive salary package. In addition to a very competitive basic salary supplemented by a number of premiums, we offer you meal vouchers, interesting group and hospitalization insurance and other extra-legal benefits. Moreover, you can opt for a company car or bike and you get 40 days of leave per year!

<u>This</u> is a job opening for which students can apply to work with us in the future. We also offer a lot of internships, students are always welcome to apply for an internship through our website.

# Belfius

Belgium

www.belfius.be

#### **Company information**

Belfius is the only integrated bank and insurance company that is 100% Belgian and present everywhere in Belgium. We offer a full range of banking and insurance products to retail customers, small and medium sized enterprises, public institutions, non-profit organisations and large corporates.

What is important to us, is what we can do for you and our society. Being the driving force of the Belgian economy. With satisfied customers as our guiding principle.

In Belgium, Belfius has stepped up to the plate to become the driving force in making the Belgian economy increasingly sustainable. In doing so, we have developed a range of financial solutions for our customers to enable them to achieve their own sustainable operating targets.

#### What do we have to offer?

Happy colleagues are just as important to us as happy customers. That's why we also invest thoroughly in their well-being.

You have heard us say it many times: we do more for your Love. But we not only delight customers with the best service and high-performance solutions, we also invest heavily in the well-being of our employees. With an open corporate culture in an inspiring working environment, and with tailor-made training courses. Because enthusiastic colleagues who feel well also perform well.

Will you soon be one of them? Help make a difference:

Apply now at belfius.be

100% Belgian: With a passion for talent

# Crosspoint Solutions

• Kontich (Belgium)

www.crosspoint.be

#### **Company information**

Crosspoint is a data company with a heart for people and innovative technologies. This way, we help companies to transform in an impactful, successful and sustainable way.

As one of the largest incubators of Belgium, we host over 50 daughter companies with a total of more than 8000 employees, providing their customers with innovative and qualitative solutions. Together we have an expertise in just about any software technology out there. We love to share this knowledge in any kind of collaboration format: project based, in-house, or others.

#### What do we have to offer?

#### Open culture

We don't believe in hierarchy, only in good ideas. There are no taboos, and we prioritize respect, collegiality and trust.

#### Passion for work, innovation and expertise

The motor behind all our successes.

#### Good atmosphere

Thanks to the fun parties, team buildings and our own sport facilities, we score high on work vibe and team spirit.

#### Ownership

We strongly believe in the power of trust and responsibility. Everyone is the captain of their own ship here.

#### Language

Speaking Dutch and English is required. Knowledge of French is a plus.

## Datashift

- Mechelen (Belgium)
- www.datashift.eu

#### **Company information**

Datashift is a consulting company based in Mechelen, with clients all over Belgium. Our services have a clear focus on data. Only data? Yes, but in all its facets and always starting from what actually brings value to our clients. Where do we really make a difference with data? In other words, we always start by fully understanding the business needs of our clients in order to detect hidden business value. By working closely with our clients in this way, an all-important relationship of trust emerges.

In our service we distinguish 3 data domains in which we assist our clients: Data Science & Engineering, Business Intelligence and Data Governance. And this from A-Z, from advice to implementation.

#### What do we have to offer?

We believe that the most sustainable way of growing as a company is by enabling our people to grow.

**Learning by doing**: After an initial bootcamp to strengthen your (technical) basics, you'll be launched very quickly into one of our project teams. We absolutely believe that gaining experience and expertise is best achieved by doing!

**Knowledge sharing**: Of course as a young graduate you'll need guidance and coaching in these real-life client situations. Luckily you're never on your own. You'll be part of a Datashift team working at the client, so you'll be surrounded by experienced colleagues who will make sure to answer your questions and to help you when needed.

**Continuous learning**: Datashift is not a top-down organisation where you get told what to do and when/how to do it. Instead it's your responsibility to take control of your career, with us there to support you where needed of course. Depending on your own interests and development, you can discover different roles at different projects, learning new skills/technologies along the way.

# Deloitte.

## Deloitte

- □ begraduatesrecruitment@deloitte.com
- Zaventem (Belgium)
- www.deloitte.be

#### **Company information**

Every day, your work will make an impact that matters, while you thrive in a dynamic culture of inclusion, collaboration and high performance. As the undisputed leader in professional services, Deloitte is where you will find unrivaled opportunities to succeed and realise your full potential.

Be the true you, bring your full, absolute self and your unique way of thinking to work, every day. Diversity of thought makes our answers stronger, and our impact greater.

#### What do we have to offer?

At Deloitte, you get more than a job, you build a career. A career that enables you to grow both personally and professionally and makes you proud to be part of our young, dynamic community. You will work on challenging assignments for a wide variety of organisations and be coached to develop your expertise.

Your wellbeing is one of our main priorities because it's only when you're comfortable and at your best that you can make the kind of impact you, and we, live for. From health benefits to flexible work arrangements, and international opportunities to insurance, you can tap into a varied rewards package when you need it. And there are so many more advantages to help you better manage your lifestyle - not just while you are at work - and reward you for being part of the Deloitte team.

Your expertise is our capability, so we'll make sure it never stops growing. Whether it's from the complex work you do, international assignments, or the people you collaborate with, you'll learn every day.

# DICE CRO

www.dice-cro.com

#### **Company information**

DICE is a clinical research organization (CRO), that carries out all biometrics aspects of clinical research for pharmaceutical and biotechnology companies, from data management to processing statistical analysis and clinical study report compilation. DICE provides (electronic) data capture, data management, statistics, PK analysis, programming, central imaging review, medical monitoring and medical writing services.

Our mission is to enhance access to medical treatment by delivering excellence in the design and execution of clinical trials.

#### What do we have to offer?

You could be part of a knowledgeable and dedicated team of experts that have a drive and curiosity that encourages them to take on projects as if they were their own. At DICE, your success is our own success.

- We offer an entrepreneurial environment where you get to partner with start-ups as well as wellestablished companies;
- You will be working on a variety of projects and contribute to different aspects ranging from design to final delivery;
- We are committed to your continuous learning and development;
- Collaboration and team spirit define our culture and strong values like service, growth, empowerment, authenticity, relationships and compassion ensure we deliver superior results for our customers.

Check our open positions on https://www.dice-cro.com/

## EY

□ recruitment@be.ey.com

Belgium

www.eycareers.be

#### **Company information**

At EY, we're dedicated to helping organizations solve their toughest challenges and realize their greatest ambitions - from start-ups to Fortune 500 companies – and the work we do with them is as varied as they are.

Through our five service lines — Assurance, Consulting, Strategy and Transactions, Accounting, Compliance & Reporting and Tax — we help our clients capitalize on transformative opportunities. We also help them fulfill regulatory requirements, keep investors informed and meet the needs of all of their stakeholders. And in a fast-changing world, we give them the support they need to be effective today and create long-term value for tomorrow.

#### What do we have to offer?

As a global leader in assurance, tax, transaction and advisory services, we hire and develop the most passionate people in their field to help build a better working world. This starts with a culture that believes in giving you the training, opportunities and creative freedom to make things better. This is what makes us different and renders working here a unique, lifetime experience.

We provide the scale, teams, and the tech. We will show you what's possible, so you'll see opportunities where others see challenges. With our help, you can make a meaningful impact, your way. A career as unique as you are. The exceptional EY experience. It's yours to build.

### HICT

□ Pieter.vanleenhove@hict.com

**Ghent (Belgium)** 

www.hict.com

#### **Company information**

Hict offers professional and committed advice with an absolute focus on healthcare.

Our experienced team of multidisciplinary advisors, reinforced with a network of experts, works continuously at the interface between healthcare providers, healthcare suppliers and the public sector.

That is why we support our clients in their ambitions through a variety of projects in the fields of strategy, policy making, process improvement, technology, health economics and market access for innovation.

Improving healthcare by unlocking the potential of data

#### What do we have to offer?

At Hict you will participate in challenging projects in a team of expert data scientists and other healthcare consultants.

You will work in a close-knit team with internal and external experts to analyse, advise and help realise solutions or provide insights that support the decision-making process of our clients. We are fostering a culture of data-informed solution design from within our organisation across healthcare stakeholders.

Are you our next data person?

You enjoy analysing data using optimal quantitative techniques.

You are able to interpret and validate results, build reports to expose insights and support decisions through data analysis.

You can present your findings in a clear and concise manner to an audience with a technical or non-technical background.

You follow and share the latest trends in related technologies.

### IDD

- □ careersBelgium@iddi.com
- Louvain-la-Neuve (Belgium)
- www.IDDI.be

#### **Company information**

IDDI is a highly recognized biostatistical and eClinical data service provider in the field of clinical research, providing agile clinical trials services for pharmaceutical, biotechnology, and medical device/diagnostic companies. Together, we want to achieve one objective: support our clients to accelerate the delivery of their drugs and improve people's health.

Over the last 30 years, IDDI has grown into a multinational company with offices in Belgium and the USA, and with over 140 talented professionals. Today, we are proud to be a valuable partner in the design, conduct, analysis and reporting of clinical trials through optimal study design, innovative statistical methodology and state-of-the-art integrated web systems that help achieve time savings and cost-effective clinical trial processes.

#### What do we have to offer?

IDDI is committed to offering employees successful careers with opportunities for internal professional growth through continuous development, on-the-job trainings, and mentoring programs.

Working at IDDI will bring you an expertise widely recognized within our industry and the opportunity for a great career journey. We also offer competitive salaries and benefit package as well as high flexibility for a better work-life balance. When we are not heads down, we never miss opportunities to celebrate and have fun too! BBQs, drinks, family events, teambuildings are a few examples of opportunities to share fun time together.

We always welcome applications for biostatisticians, junior clinical data managers and (statistical) programmers to join our team. We also welcome students for internship opportunities allowing opportunities for learning from our experts and contributing to IDDI.

# mec

# imec

- Leuven (Belgium)

We currently have open full-time and internship positions for Data Scientists, Machine Learning Engineers, and Data Engineers. Come and speak with us to learn more about the exciting opportunities available at our company.

Machelen (Belgium)

www.careers.pwc.be

#### **Company information**

What comes to mind when you think of PwC? Auditing? Tax? Accounting? Consulting? We're all of those things - and so much more! PwC is your opportunity to learn with purpose, lead with heart, and make a positive impact on the world.

Join a community of solvers seeking to help firms fulfill their potential to the benefit of others.

Working together to create a fairer world for all

# pwc

#### What do we have to offer?

Want to be our future colleague?

Find out more and apply now through this link.

We can't wait to meet you!

# Python Predictions

- Brussels (Belgium)
- www.pythonpredictions.com

#### **Company information**

Organizations do not become data-driven overnight. Insights from data science & business intelligence, enabled by data foundations & data strategy, can help organizations meet their strategic goals. Python Predictions is a Brussels-based team specialized in making organizations data-driven and guide them along the data highway.

#### What do we have to offer?

You see these amazing stories about how data is changing the world. You want to kickstart or reboot your career in an inspiring and innovative domain. You would like to contribute to concrete data projects. Perhaps you like to analyze data, build fantastic dashboards, predict future behavior, set up data platforms or make rock-solid

data pipelines. But you're only at the beginning of your journey – so how do you get started? The answer is simple:

Our Data Fast Track: The Data Fast Track is a 4-week full time onboarding program for new team members. This program packs everything needed to succeed in your job and in our team. Whether you dream of a role as a data scientist, data engineer, analytics translator or information expert, you learn the basics of what it means for modern organizations to be data-driven. You get introductions into all domains and competences (business, technical, analytical, legal) needed in modern companies to succeed.

But wait, there is more. You also gain a view on the essential technical, consulting and business skills that will help you succeed in your role. We introduce you to competence centers and key people in our organization and you obtain a full understanding of our way of work. And you practice your skills in an internal challenge related to your interests. You will be assigned to a coach, and work together with your coach on a concrete development plan for your first year in our team. Our next Data Fast Track will take place in September 2023.

## RiskConcile

- Leuven (Belgium)
- www.riskconcile.com

#### **Company information**

RiskConcile is a FinTech company based in the city of Leuven that supports the financial sector with a comprehensive suite of technology solutions. Our client base is global and includes banks, asset managers, insurance companies and hedge funds. The tools developed by RiskConcile are cloud-based and driven by data from our clients and data providers. Combining these data with our financial models is the core of our business model. We are currently developing tools for climate stress testing and network analysis.

# RISK CONCILE

#### What do we have to offer?

RiskConcile combines professionals with knowledge and experience from various fields such as mathematics, computer science, private equity, and financial modeling. Our team and client base are growing rapidly, providing many opportunities for young professionals.

#### Full time positions

We are currently looking for a data-savvy individual to join our team. At RiskConcile, you will be responsible for integrating customer data into our existing software solutions. Your toolbox will include AWS, Airflow, PostgreSQL and of course Python.

#### **Internships**

During the summer break, RiskConcile hosts a small group of interns who work on research-related problems. Projects are usually done in the area of network, or text analysis, or financial modeling. Python knowledge is a must!

## Sciensano

- Brussels (Belgium)
- www.sciensano.be/jobs

#### **Company information**

Science, health and society are central to our mission. Our focus is on the close interconnection between human and animal health and their environment. We combine different perspectives in research to contribute in a unique way to everybody's health. We perform our assignments at 5 different levels of government (federal, regional, community level, European and international level) in the following 6 fields of action:

- Health and environment
- Food consumption and food safety
- (Epidemiological) health and disease monitoring
- Animal health
- Quality of healthcare
- Effectiveness and safety of vaccines, medicines and health products; and quality of medical laboratories.

#### What do we have to offer?

Whatever position you step into, you will contribute to Sciensano's public health mission. You will join an enthusiastic team that enjoys working together, sharing knowledge and experience, inspiring each other. You will join a knowledge-intensive working environment where you will face many challenges and be able to work independently.

Our employees have varied academic backgrounds and professional career paths and work in interdisciplinary teams.

We pay attention to you achieving a balance between your professional expectations and your personal priorities. A variety of advantages and facilities are available to meet your needs and enable you to work in an effective manner.

You want to join us? Check our open positions!

You want to do a thesis in collaboration with Sciensano? Check the opportunities on our website or submit your project.
